

Your contract manufacturing partner for VMS and OTC products

At Delavau Pharmaceutical Partners, we combine our expertise, innovation, and capability to take products from concept to packaged good through **CLIPP™**, our **Closed Loop Integrated Precision Process**. We bring *pure precision* to each of our contract manufacturing partners, from product development to granulation to high volume tableting and packaging. And with continuous manufacturing capabilities, we offer the highest quality products on the market.

| Continuous manufacturing

CLIPP™, our Closed Loop Integrated Precision Process, continuously monitors all critical process parameters as part of our commitment to Quality by Design. From granulation to blending, compression to coating, CLIPP™ ensures consistency in all products.

| With CLIPP™, we ensure:

- Increased uniformity in chemical and physical properties of the granulation
- Greater content uniformity and particle size consistency
- Tablets consistent in thickness, hardness, and weight
- A full turnkey process that delivers the industry's highest quality tablets
- Enhanced control and real time monitoring deliver the highest quality product

| Product development

We apply our expertise as a contract manufacturer to efficiently and reliably turn new innovations and custom formulations into shelf-ready products. Experienced in both the formulation and manufacturing of VMS and OTC products, we partner with customers at all stages of the product development and production cycle. At Delavau, the entire product development process stays under one roof for easy, efficient scaling from formula development to full-scale production.

source to seal with CLIPP™

Packaging

Our high-speed packaging lines offer broad and flexible capabilities that meet customer specific needs, and are equipped with vision and barcode verification.

Laboratory testing

Our Quality Control and Analytical Laboratories provide quality in-house analysis for active pharmaceutical ingredients (APIs), raw materials, excipients, intermediates, and finished products, to ensure uniformity and reliability. Some of our testing capabilities include:

- Release and Stability testing as per USP/NF, BP, EP, JP, FCC, as well as non-compendial in-house or customer-developed methods
- Analytical Method Development/Validation/Transfer
- ICH Stability
- HPLC & UPLC with UV/Vis, PDA & RI
- ICP-OES/ICP-MS
- Dissolution
- Rapid Micro Technology
- FTIR, UV/Vis Spectroscopy
- TOC & Conductivity
- Karl Fischer, Optical Rotation, Refractive Index
- Wet Chemistry Techniques (USP/NF, EP, JP)

Delavau ensures that every product is high quality, consistent, and produced with *pure precision™*.
